How to Measure a Rubber Band

Rubber bands are measured via three dimensions

- Flat Length (lay flat length)
- Width (cut width)
- Wall (thickness)

To measure a rubber band:

1. Pinch a rubber band at each end to lay the band flat. The distance from end to end is the flat band length.
2. The width of the band measures how wide the band is, perpendicular to the length.
3. The wall measures the thickness of the band.
